# LAST & THOMAS

## Liquids, Gases and Electricity

Can be measured as correctly as a pound of sugar or a gallon of syrup. In this add I will not say a word about the home comforts enjoyed by the uses of the electric current but instead tell you something of our meters and the system employed to keep them measuring correctly.

We maintain a meter testing and repairing department where we cheerfully invite the public whenever a meter is to be tested. If you think the bill rendered is not in accordance with the amount of current consumed, your meter will be tested, and if found correct, will again be reset in your store or residence. Our proving instruments, used for testing are manufactured by the Weston Electric Manufacturing Company of New Jersey, and next to a fine watch, there is no other mechanism so accurate or precise as the electric meter of today.

The Westinghouse and General Electric Co.'s are the two leading manufacturers of electric meters. Expert talent is constantly in this field of work for improvement and accuracy. Gas and electric meters usually run slow after the first or second year of use and are then brought in for correction. New York, Massachusetts and other states have frequently proven the accuracy of gas and electric measuring instruments by creating an office of public inspection for the purpose of carrying on this work, and the results obtained have been so universally accepted by engineers, mechanics and competing companies manufacturing electrical measuring instruments that doubts of their correctness, are no longer held.

## CHAMBER OF COMMERCE MEETS

TO ELECT NEW PRESIDENT TO FILL VACANCY.

Motion Passed Instructing Railroad Committee to Use Best Efforts to Secure Reduced Rates.

At the meeting of the Ogden Chamber of Commerce last evening William Bostaph was elected president to fill the vacancy occasioned by the resignation of S. H. Browne. A vote of thanks was tendered Mr. Browne and also J. T. Rushmer, ex-member of the board of directors.

Fifteen standing committees were appointed for the ensuing years, as follows: Membership—S. H. Browne, J. T. Rushmer, G. T. Porter, O. A. Kennedy, Finance and Auditing—G. T. Porter, A. E. Pratt, C. M. Clay, J. T. Rushmer, A. W. Browne. Advertising and Printing—A. W. Browne, H. S. Foster, J. T. Rushmer, S. H. Browne, S. H. Henderson. Rooms and Exhibits—W. L. Russell, J. H. Hill, W. J. Critchlow, E. G. McGuffin.

Railroads and Rates—A. E. Pratt, S. H. Browne, S. S. Smith, G. T. Porter, H. W. Brown.

Manufacturing and Wholesale—J. J. Brummitt, W. G. Freiday, H. Belnap, O. A. Parmley, W. J. Harris, Harold Perry.

Horticulture—C. M. Clay, J. H. Hill, W. L. Russell, Enoch Farr, E. G. McGuffin.

Stockraising—J. H. Hill, W. L. Russell, C. M. Clay, P. A. Mattson, M. Skeen.

Irrigation and Drainage—W. M. Bostaph, J. C. Nye, W. J. Critchlow, W. E. Robinson, C. W. Hootey.

Mining and Smelting—O. A. Kennedy, J. J. Brummitt, W. M. Bostaph, F. L. Woods, B. F. Sooy, Albert Swingswood, E. A. Stratford.

Insurance and Fire Protection—W. J. Critchlow, O. A. Kennedy, J. C. Nye, B. H. Cannon, Ed. Auth.

Good Roads and Public Improvements—J. C. Nye, W. M. Bostaph, W. G. Freiday, Horace Peery, C. C. Rasmussen.

Pure Food and Costs of Living—S. S. Smith, A. E. Pratt, H. S. Foster, S. H. Henderson, Jos. Cheez.

Public Utilities and Taxation—H. Belnap, J. J. Brummitt, S. S. Smith, A. P. Bigelow, O. A. Parmley.

Schools and Libraries—W. G. Freiday, H. S. Foster, H. Belnap, Hyrum Pingree, G. A. Greave.

A motion was unanimously carried that the committee on railroads exercise their best efforts toward securing equitable railroad rates over the Hartman roads for the Four-State Fair in contemplation for Ogden this year. The committee was instructed to report their labors at the next meeting of the organization.

A resolution was passed that the city council be requested to place the names of the streets and avenues of the city at the intersection of the same in conspicuous places that the strangers in the city could keep their bearings. It was stated at the meeting that the city fathers have in their possession metallic names of the various streets and avenues of the city, purchased some two years ago, and that they should be placed where they could be seen by the public.

The public utilities committee was instructed to inquire into the feasibility and the desirability of the city purchasing the water interests of the Ogden Ranch Canal company and report their findings at the next meeting.

Simon Bamberger, president of the Salt Lake and Ogden Railway company, was admitted to membership in the Chamber of Commerce as an honorary member by a unanimous vote of those present. This honor was conferred upon Mr. Bamberger because of the fact that he had built an interurban railroad into the city which is of commercial value to Ogden.

A resolution was also unanimously passed that the Chamber of Commerce is opposed to the appropriation of an additional \$5,000 to the park commission of the city until the streets of the city are designated at intersections thereof.

## MINING NEWS

ARIZONA MAN HAS A NEW ORE MILL

Produces New Device for Treatment in Place of Stamp Mill.

New inventions are being made every day for the treatment of ore and among the latest is that of Julius Johnson of Mesa, Ariz. His machine had been covered by many patents during the past two years and the machinery is now being given a tryout as to its advantages. The model machine, which was built by Mr. Johnson, is being used by the Shattuck-Nimmo company in its work at the Bull Dog mine, near Goldfield, Ariz., and is said to be giving satisfaction. It is declared to be much cheaper and more effective than the stamp mill.

The new machine differs radically in principle from the prevailing stamp mills, the grinding forces being the centrifugal force imparted to the ore by the revolution of the cylinder in which it is contained and the action of a rapidly revolving smaller drum placed inside the cylinder into which the ore is fed.

The new machine may be briefly described as follows: A small circular drum filled with concrete or some solid material to prevent its being crushed by the impact of the heavy ore is placed on a horizontal bearing. The outside surface of this drum is

covered with lengths of railroad iron. This drum is to be revolved at a speed from one to three thousand revolutions per minute. Outside this drum, and bearing upon its upper circumference, is a large drum, the inside of which was, according to original specifications, covered with railroad iron. However, practice has shown that the armoring of the outside drum is unnecessary and in the future the grinding surface of the outer drum will be left smooth.

Motion is imparted to the other drum by the friction of the smaller drum within, which is geared directly to the engine, the outer drum thus traveling at a considerably slower rate than the one within and the rate of revolution of the entire machine is sufficiently great to throw the material between the drums at their point of contact. Besides being thrown between the drums the major portion of the rock is finely ground before coming in contact with the rollers by impinging upon other rock in the revolving receptacle. At one end of the outer drum is a fine mesh screen through which the ground material will pass. The passage is facilitated and the mechanism cooled at the same time by the passing through the outer cylinder of a current of water. That portion of the gold, or concentrate, which does not pass through the screen will, because it is of greater weight than the rougher material, be found in the coating of the outer drum and can be secured by the removal of the outer cylinder. This finely ground matter also furnishes a grinding surface after the machine has been in operation for about one minute by forming a deposit on the metal inside surfaces and thus preserving them from any wear or friction.

It is estimated that the new contrivance, equalling in capacity a 100-stamp mill, can be operated by a 30-horsepower gasoline engine, since after the full speed is once attained the inertia of the heavy drums tends to continue the revolution and very little power is required to maintain the speed.

In development work the machine may prove of special value since they are to be made of only one size, a large one having been found to be no more expensive to manufacture than a smaller one. By running a shorter or longer time the new invention can be economically adapted to the needs of any property which requires from 10 to 100 stamps.

A small plant can thus increase its milling capacity without any increase in expenditure of money other than that required to keep the machinery in motion. The assembling of the contrivance is complete and it can be separated into a number of small parts, thus making its freightage comparatively easy. A mechanism is provided which automatically regulates the feed of ore while in operation the machine requires very little attention.

## MINING MAGNATE IN SUIT FOR DIVORCE

Los Angeles, April 7.—A D. Myers, a Goldfield mining man, who made a million dollars, it is reported, in the Mississippi river levee contractors, is defendant in a suit for divorce, filed in the superior court by Mattie M. Myers. Mrs. Myers asks for a divorce decree and a property settlement. There are no children.

Neither Mr. nor Mrs. Myers would discuss their defenses today.

Mr. Myers has lived in Los Angeles, where he has a palatial home, he has retained large interests in Goldfield.

## CONTRACTORS INDICTED

Little Rock, April 7.—A. M. Morrow, G. C. Price and R. L. Leonard, three Mississippi river levee contractors, were indicted in the federal court here today, charged with working their employees over eight hours per day on government work.

## A Business Talk

From Ocean Park, Cal. By J. T. H.

Having been called away from Ogden, this little talk must come from a distance, and may not just hit the mark, for we are shooting at a mark in talks—the ears of the Ogden people, and we trust that you will take a moment's time to read what we say, because it costs money to buy newspaper space.

In a recent ad we advocated the inauguration by the State Journal of a 50 per cent discount sale on subscription of course this was ironical, as were some other expressions we have used of late. We didn't mean it. The large idea is to adopt it. Get out a Better Paper. Give greater values; put more hustle into the business; go after and secure a larger circulation, so that we advertisers will have bigger orders to preach to, and then charge the lowest legitimate price for it.

We have adopted the one price idea in our suit department and expect to have a big success because of our belief in the justice of this stand and our confidence in the people of Ogden.

In our next talks, we will tell you some of the reasons why we have taken this stand.

## SALT LAKE AND STATE NEWS

FOUR COUPLES WED

Bank Cashier Halvorsen Resigns—Clarence Stauffer of Willard Hurt.

Brigham City, April 7.—The following young couple from Brigham City were married in the Salt Lake temple last Wednesday.

Frank W. Earl and Miss Sophia Johnson of the First ward, Henry L. Thorn of Perry and Miss Oneta Johnson of the First ward, Elmer Demers of the Second and Miss Edna Anderson of the First ward, Chauncey Nichols, son of the late Bishop Alvin Nichols, and Miss Eva Pearce (sister of Dr. R. A. Pearce of this city, were married at Ogden last Monday, Judge Murphy officiating.

Shauncey Stauffer, a young man from Willard, met with an accident at that place Thursday morning. He was going to the farm work, when at the railroad crossing the Malad mixed train was there; in order to save time he climbed up between the cars to get across, when his foot slipped, bringing him to the ground. Just then the engine backed the train and caused Mr. Stauffer's foot, which was badly crushed. The train took him to Brigham City, where he was taken to the hospital for medical attendance.

James E. Halvorsen who for about three years has been the cashier of the State bank of Brigham City, has severed his connection with that institution and has accepted the position of cashier of the Ogden State bank. Assistant William T. Davis will now take the cashier's chair and his brother, David Davis, will be the assistant.

## IDAHO CITY ELECTIONS

Pence Is Mayor of Boise—D. W. Church Is Chosen in Pocatello.

Boise, Idaho, April 7.—Joseph T. Pence, Democrat, has been elected mayor over John M. Haines, Republican, after one of the most bitter campaigns in the history of the city, in which churches, unions and saloons were involved. Pence's majority was 150.

At Twin Falls, Carl J. Hahn of the Business Men's ticket received 226 votes for mayor. T. J. Warner, representing the anti-saloon movement, received 149.

At Weiser what is known as the Citizens' ticket was defeated by the Citizens' ticket. The following officers were elected: Mayor, Harry W. Wulff; city clerk, S. H. Travis; city treasurer, Mrs. Fannie Riggs; city engineer, F. D. Maxwell; councilmen, First ward—P. E. Smith, William Van Cleave; Second ward—Frank Harris, Tunis Terwilliger; Third ward—A. C. Cordon, R. C. McKinley.

## AT POCATELLO.

Pocatello, April 7.—A Republican victory was scored over the Citizens' party at the biennial city election, which closed here last night. With the exception of John M. Bistline, Democratic candidate for the First ward, the entire Republican ticket was elected. D. W. Church, mayor; L. F. Molinelli, clerk; Alfred Moses, police judge; Mrs. C. A. Bryan, treasurer; W. A. Samms, engineer. Councilmen—First ward, J. M. Bistline and J. F. Dodson; Second ward, J. Williams and C. A. Valentine; Fourth ward, W. N. McCarty and H. K. Higson. J. P. Church was the opponent of Mr. Bistline. The weather was cold, disagreeable, with light snow falling in the forenoon.

## SHOCKING ACCIDENT

Little Wallace Peterson Crushed to Death Under Traction Engine.

Levan, Juab county, April 7.—A shocking accident occurred here Thursday, April 1, when Wallace Peterson, the 13-year-old son of Mr. and Mrs. E. W. Peterson, was instantly killed. Young Wallace was on his way home from school when the new traction engine and one car of the Robinson Plaster company. He tried to board the engine, which was moving slowly, but missed his hold and fell in front of the car, which passed over his body, killing him instantly.

## LANDS SOON TO BE OPENED TO THE PUBLIC

One Million Acres in Utah Will Be Added to Present Area.

According to information given out by the United States land office Wednesday morning, almost 1,000,000 acres of land in various parts of the state of Utah are soon to be thrown open for public entry. The lands will be opened under the new act recently passed by congress, providing for the enlargement of the homestead from 160 to 320 acres. Captain George E. Hair, special land commissioner, and other prominent land experts are at present classifying the lands, and as soon as they conclude their work a report will be submitted to the secretary of the Interior, after which the homesteads will be opened.

The recent act of congress provides for the enlarging of the homestead on all non-mineral, non-timber and non-irrigable public lands in the states of Utah, Colorado, Montana, Nevada, Oregon, Washington, Wyoming, Arizona and New Mexico.

The first opening of land will include about 1,000,000 acres scattered throughout the state. The date of the opening or the exact location of the land has not yet been decided. Land containing merchantable timber, mineral lands or lands which may be irrigated at a reasonable cost from any source of water supply may be entered under this act, and no entry shall embrace in the aggregate more than forty acres of land susceptible of irrigation from natural sources.

## ANOTHER BIG STRIKE IN THE CONSOLIDATED

Immense Body of High-Grade Ore Opened on Lucky Boy Claim.

Goldfield, Nev. April 7.—Another enormous strike, duly authenticated, was made public today when Consolidated stock took a rise. On the Lucky Boy claim of the Jumbo estate, lying south of the Red Top, the ore has been entered for twenty feet and is ten feet in width. Assays are up to fifty-eight ounces in gold to the ton or more than \$1,000. The entire vein is

We've made special preparations for this date, which in the world of fashion as well as nature, makes a decided change in foliage.

The first touch of Spring is the signal to drop the old and don the new. We have the correct "get-up" from top to toe.

easily \$150 clear across the ten feet, and the ledge is broadening and taking the trend of the famous Hampton stone in the Combination, which is one of the biggest finds in mining history.

This strike, following closely upon that of the Combination, apparently places the Consolidated beyond the realms of possibility, but the figures are official and there is now no telling where the next whale of a find in this gigantic estate will be made. There is enough ore practically blocked out in the various properties of the Consolidated at this time to keep both mills going night and day for many years. That the regular dividends of 30 cents a share a quarter will be increased by extras this year seems to admit of no doubt whatever.

## CONDITIONS GROWING WORSE

One Wire Working East of Chicago, Poles and Trees Go Down in Gale

Chicago, April 7.—As far as Pittsburgh, trees and poles went down rapidly in today's gale, according to the telegraph companies. Every wire is reported down east of some points. Of the numerous leased wires running east of Chicago, but one was working this morning, and conditions were said to be growing worse.

In this city several persons received minor injuries from toppling fences and loosened sign boards. Scores of plate-glass windows were broken. By far the most freakish whim of the storm was to give a perilous ride to Samuel Holland, an elevated railroad conductor. Holland was seated on the runaway in a box car on the Metropolitan road, when the roof was lifted by the gale. It maintained a horizontal position and Holland went whirling away.

He lit over a hundred feet from the starting place none the worse for his experience. The roof settled to the ground with comparative steadiness considering its weight.

Friends among the trams crew insisted that the conductor must be internally injured and took him to a physician, but it confirmed Holland's statement that he was uninjured.

Memphis, Tenn., April 7.—Eight persons are known to have been killed by the storm that swept over Northern Mississippi early last night. The tornado covered a wide area and wrought much damage to crops. At Aberdeen, Miss., W. C. McMillan, cashier of the bank, and his son, T. T. McMillan, were instantly killed in the wreckage of the Illinois Central station. Two negroes also met death.

At West Point, Miss., much damage was done on the Terrell plantation.

## CITED FOR CONTEMPT

Reno, Nev., April 7.—George Graham Rice and Merrill A. Teague, editors of the Nevada Mining News, were ordered cited for contempt of court by Judge Langan, today, for publishing an article on March 25, accusing Bank Examiner F. E. Wilds of malfeasance in office and attacking Judge Langan for not punishing him. The citation is issued for April 24.

## FISHERMEN WERE NOT DROWNED NEAR RIGA

St. Petersburg, April 7.—There is no truth in the report published in the United States that more than 1,500 Russian fishermen have been drowned near Riga by the overturning of a huge iceberg, on which they had taken refuge. According to Riga advices, a large number of fishermen did land on an iceberg, but they were all removed without fatalities. Eighty-seven fishermen from Riga were forced by heavy weather to take refuge on floating ice on April 4. They were carried out to sea for some distance but rescuing parties went after them and brought them all back.
